- 22       this subsection, as effective after December 31, 2005, shall be used to
- 23       calculate the adjusted ADM for the previous year rather than the
- 24       calculation used to calculate adjusted ADM for 2005 distributions. For
- 25       purposes of this article, a school corporation's "adjusted ADM" for the
- 26       current year is the result determined under the following formula:
- 27       **STEP ONE: Determine the sum of the following:**
- 28       **(A) The greater of zero (0) or two-tenths (0.2) multiplied**
- 29       **by the result of the school corporation's ADM for the year**
- 30       **preceding the current year by four (4) years minus the**
- 31       **number of students who were included in the school**

corporation's ADM for the year preceding the current year by five (5) years and were not included in the school corporation's ADM for the year preceding the current year by four (4) years because the students transferred to another school corporation under IC 20-26-11-31.

(B) The greater of zero (0) or two-tenths (0.2) multiplied by the result of the school corporation's ADM for the year preceding the current year by three (3) years minus the number of students who were included in the school corporation's ADM for the year preceding the current year by four (4) years and were not included in the school corporation's ADM for the year preceding the current year by three (3) years because the students transferred to another school corporation under IC 20-26-11-31.

(C) The greater of zero (0) or two-tenths (0.2) multiplied by the result of the school corporation's ADM for the year preceding the current year by two (2) years minus the number of students who were included in the school corporation's ADM for the year preceding the current year by three (3) years and were not included in the school corporation's ADM for the year preceding the current year by two (2) years because the students transferred to another school corporation under IC 20-26-11-31.

(D) The greater of zero (0) or two-tenths (0.2) multiplied by the result of the school corporation's ADM for the year preceding the current year by one (1) year minus the number of students who were included in the school corporation's ADM for the year preceding the current year by two (2) years and were not included in the school corporation's ADM for the year preceding the current year by one (1) year because the students transferred to another school corporation under IC 20-26-11-31.

(E) The greater of zero (0) or two-tenths (0.2) multiplied by the result of the school corporation's ADM for the current year minus the number of students who were included in the school corporation's ADM for the year preceding the current year by one (1) year and were not included in the school corporation's ADM for the year preceding the current year by one (1) year because the students transferred to another school corporation under IC 20-26-11-31.

~~STEP ONE:~~ **TWO:** Determine the sum of the following:

(A) The school corporation's ADM for the year preceding the current year by four (4) years multiplied by two-tenths (0.2).

(B) The school corporation's ADM for the year preceding the current year by three (3) years multiplied by two-tenths (0.2).

(C) The school corporation's ADM for the year preceding the current year by two (2) years multiplied by two-tenths (0.2).

- 1 (D) The school corporation's ADM for the year preceding the  
 2 current year by one (1) year multiplied by two-tenths (0.2).  
 3 (E) The school corporation's ADM for the current year  
 4 multiplied by two-tenths (0.2).  
 5 Round the result to the nearest five-tenths (0.5).  
 6 **STEP THREE: Subtract the STEP ONE amount from the**  
 7 **STEP TWO amount.**  
 8 ~~STEP TWO:~~ **FOUR:** Determine the sum of:  
 9 (A) the school corporation's ADM for the year preceding the  
 10 current year; plus  
 11 (B) the product of:  
 12 (i) the school corporation's ADM for the current year minus  
 13 the clause (A) amount; multiplied by  
 14 (ii) seventy-five hundredths (0.75).  
 15 Round the result to the nearest five-tenths (0.5).  
 16 ~~STEP THREE:~~ **FIVE:** Determine the greater of the following:  
 17 (A) The ~~STEP ONE~~ **THREE** result.  
 18 (B) The ~~STEP TWO~~ **FOUR** result.  
 19 (b) A charter school's adjusted ADM for purposes of this article is
